Demos

- Review schema
- Add dimensions
- Add measures
- Documentation

Try this on your laptop?

- Install VS Code
 - Install Extension: Power BI MCP Server
- Install Claude Desktop
 - Configure to use Power BI MCP Server
 - Maybe free account is okay, I have paid \$20 / month account
- Install Power BI Desktop
- Sample data, I got one from
 - <https://www.kaggle.com/datasets>

Claude config: example

```
{ "mcpServers": { "powerbi-modeling-mcp": { "command":  
"C:\\Users\\skadi\\.vscode\\extensions\\analysis-services.powerbi-modeling-  
mcp-0.4.0-win32-x64\\server\\powerbi-modeling-mcp.exe", "args": [ "--start"  
] } }}
```
